

DST at the 63rd Annual Conference of Metallurgists (COM)

At the 63rd Annual Conference of Metallurgists (COM) held in Halifax from August 19 to 22, Jean-Philippe Mai, President and CEO of DUNDEE Sustainable Technologies Inc. gave a presentation on “Aspects of Detailed Engineering of a GlassLock Vitrification Plant: Legacy Arsenical Dust Stabilization at a World-Class Mining Operation”.

This presentation was an excellent opportunity to highlight the advantages and added value of using our GlassLock process.

Our Technical Director also attended the event and took the opportunity to participate in one of the tours organized by the organization, which enabled him to visit Montague Gold Mines as well as Peggy's Cove.
