

## DST at MINExpo

The 2024 edition of MINExpo was held from September 24 to 26 in Las Vegas, USA. MINExpo is the world's largest mining event. Our Vice-President, Environmental Performance and Sustainability, Brent Johnson, attended as the company representative and as part of the Canadian delegation with MSTA Canada.

Once again, it was an excellent opportunity to discuss our CLEVR and GlassLock processes with various parties, as these are aimed at cyanide-free mining and arsenic stabilization in the mining and metal processing sectors.
