

DST at PDAC 2025

At the beginning of March, five of our members - Jean-Philippe Mai, Arved Marin, Brent Johnson, Antoine Maltais and Joey Isabelle - were in Toronto for PDAC 2025.

Their presence at our booth, as well as at various meetings, roundtables, sessions and other events was an excellent opportunity to showcase our technologies, the CLEVR and GlassLock processes (cyanide-free gold extraction and arsenic stabilization processes), explore new opportunities and reconnect with numerous companies.
