

DST at Québec Mines + Énergie 2024

DST's Operation Director, Olivier Sanfaçon, and Process CEP, Antoine Maltais, were at the 2024 edition of Québec Mines + Énergie which took place from November 18th to 21st in Quebec City. Training courses, conferences and exhibitions kept them busy the days they attended.

Nonetheless, on Wednesday, Nov. 20th, Olivier had the opportunity to talk about DST and our technologies, the CLEVR and GlassLock processes (cyanide-free gold extraction and arsenic stabilization processes), on stage.
