

DST at Extraction 2025

From November 16 to 20, 2025, DST was in Phoenix for Extraction 2025. Olivier Sanfaçon, Operation Director, and Antoine Maltais, Process CEP, proudly represented the company.

They presented the following during the event:

“Keynote: Arsenic Removal and Stabilization from Enargite, Arsenopyrite and Tennantite Copper/Gold Concentrates ” – as part of the technical session “Mineral Processing – 9”.

The poster features a crumpled black plastic bag in the upper half. The Dundee Sustainable Technologies logo is in the top left, with 'CLEVR GLASSLOCK' below it. A circular portrait of a man is on the right. The title and speaker information are in the bottom half.
