

DST at the World Mining Congress 2026

At the end of June, Jean-Philippe Mai (President & CEO) and Antoine Maltais (Process CEP) were in Lima, Peru for the World Mining Congress. Their presence at the event, on the floor but also for various B2B meetings, opened opportunities within the industry and potential clients.

As part of the WMC technical program, DST's paper was also selected to be presented, which Antoine brilliantly did. Hence, our GlassLock Process™ was put forward during his technical presentation.
